

HVAC Project Engineer

About the Opportunity

Javan Engineering is seeking an enthusiastic and driven individual for a HVAC Project Engineer position. This individual will be responsible for:

- Performing consulting engineering duties for all phases of building mechanical projects (HVAC, Plumbing, Fire Protection) including conceptual design, basis of design, detailed design, and providing support in construction and commissioning
- Preparing cost of work estimates and reports for all phases
- Performing field walk-downs to obtain background measurements, equipment locations, tie-in and demo points
- Coordinating activities with other engineering disciplines, Javan and client project managers and engineers
- Supervising designers in preparing drawing packages
- Preparing contractor bid specifications
- Conducting vendor and contractor bid reviews
- Mechanical scope project success; i.e. quality, cost, and schedule

Qualifications

- Bachelor of Science degree in Mechanical Engineering (or Architectural Engineering with HVAC focus)
- Good written and verbal communication skills
- A minimum of 10 years building mechanical project, full phase, engineering experience with HVAC, Plumbing, and Fire Protection codes
- Pharmaceutical project experience necessary
- New Jersey P.E. is required
- Project manager and supervisory experience is a plus
- Experience with Trane HVAC programs is a plus

We are conducting interviews with qualified candidates immediately!
