

Junior Mechanical Engineer

About the Opportunity

Javan Engineering is seeking an enthusiastic and driven individual for a Junior Mechanical Engineer position. This individual will be responsible for:

- Equipment and piping specification and layouts
- Working in a project team with engineers and designers
- Performing calculations and preparing basis sizing reports for pressure relief device projects
- Participating in field surveys to obtain background information specific to primary and secondary projects
- Researching and applying information from professional standards, government codes, and vendors to chemical processes, applications, and transfer system ducting/piping calculations
- Communicating professionally with clients, vendors, and Javan employees

Qualifications

- Bachelor of Science in Mechanical Engineering required
- Experience in consulting engineering with P&ID's and process equipment
- Experience in chemical or pharmaceutical industry is preferred
- 0-3 years experience (internships included)
- Good written and verbal communication skills
- EIT is a plus

We are conducting interviews with qualified candidates immediately!
